What is HemoZel Suppositories?

A natural product endorsed by a clinical study, that helps to improve the symptoms of internal Hemorrhoids, with an effective formula which provides rapid and prolonged relief for anorectal discomfort.

Suppositories are known to effectively promote the absorption of ingredients and release in the body.

Benefits of HemoZel Suppositories

- Soothes itching, stinging and helps relieve pain.
- Reduces inflammation.
- Promotes healing, tissue regeneration and prevents bleeding.
- It also favors other conditions such as anal fissures or cracks.
- Acts as an antiseptic, avoiding possible infections.

What are Internal Hemorrhoids?

Internal Hemorrhoids are inflamed blood vessels that are located inside the rectum, affecting 75% of the adult population at some time in their life, although it also appears in children.

Such condition is generally presented by the frequent effort to make small and hard bowel movements and the result of heavy lifting. Other associated conditions may be obesity, pregnancy and sitting or standing for excessively long periods.

Ingredients:

- *Hamamelis Virginiana*
- *Menthol*

Hamamelis Virginiana

It is a natural shrub that grows in humid or boggy forests with warm temperatures, originally from Virginia, United States. Also known as Witch Hazel.

Due to its astringent action, it promotes healing and acts as an anti-inflammatory and anti-hemorrhagic.

It is also accredited with venotonic, vasoprotectives, moisturizing, diuretic, antioxidant, antiseptic and bactericidal virtues.

Menthol

It is a saturated secondary alcohol, found in the oils of some mint species, native to the Mediterranean.

Menthol stands out for its analgesic, anti-irritant and refreshing properties, reducing pain and providing a feeling of well-being.

Clinical study

In Herbresearch2, Tussenhausen-Mattsies, Germany and the University of Petra, Amman, Jordan, a clinical study was conducted on the efficiency of the ingredients Hamamelis Virginiana and Menthol for the treatment of Hemorrhoids.

Clinical study

The study preparation consisted of Suppositories composed of 400mg Dry leaf extract of Hamamelis Virginiana L., extraction solvent 30% Ethanol m/m and 25 mg of Menthol in a matrix of hard fat. Suppositories were applied twice a day.

It was performed in patients between 33-58 years old, that presented chronic Hemorrhoids, measuring during the symptomatology trial such as rectal bleeding, constipation, mass sensation, burning, itching, edema, and anal discomfort.

After 8 days of treatment, a 98.8% reduction in the symptoms was observed with respect to the initial value, without adverse reactions.
